

Updated & Streamlined Gym Plan

Efficient Body Recomposition & Posture Alignment

1. Weekly Schedule

Day	Activity	Focus
Monday	Gym Workout A + Quick Posture	Full body, quad/glute focus, horizontal pulling.
Tuesday	Quick Posture + Light Walking	~7 mins stretching + 20 mins brisk walking.
Wednesday	Gym Workout B + Quick Posture	Full body, hamstring focus, upper body width.
Thursday	Quick Posture + Light Walking	~7 mins stretching + 20 mins brisk walking.
Friday	Gym Workout A + Quick Posture	Full body, quad/glute focus, horizontal pulling.
Saturday	Gym Workout B + Quick Posture	Full body, hamstring focus, upper body width.
Sunday	Complete Rest	Recovery.

2. The Under 7-Minute Posture Routine

Perform this short routine before lifting, or whenever you have a few spare minutes on rest days.

Exercise	Sets/Reps	Execution
Cat-Cow Stretch	1 x 20 reps	One continuous set. Exaggerate the "cat" hump to practice tucking your pelvis under.
Kneeling Hip Flexor	1 x 45s /side	Crucial for APT. One long hold per leg. Squeeze your glutes hard before leaning into the stretch.
Doorway Pec Stretch	1 x 45s	One long hold. Step through the doorway until your chest opens up.
Prone Cobra	1 x 15 reps	Lie face down, lift chest, squeeze shoulder blades together for a 2-second hold at the top.
Glute Bridges	2 x 15 reps	Lying on your back, push through your heels. Squeeze glutes hard at the top. Replaces the plank for easier, direct APT correction.

3. Gym Workout A (Streamlined Volume)

Volume reduced to 2 working sets per exercise to prevent fatigue. Rest 90-120 seconds between sets.

Exercise	Sets x Reps	Execution Notes
Goblet Squat	2 x 10-12	Hold a dumbbell vertically at chest level. Keep torso upright.
Romanian Deadlift (RDL)	2 x 10-12	High Priority. Push hips back until you feel a stretch in hamstrings. Squeeze glutes at the top.
Seated Cable Row	2 x 12-15	Use a wide grip. Keep chest up and pull elbows back.
Dumbbell Bench Press	2 x 10-12	Keep shoulders pinned back into the bench. Lower weights under control.
Dumbbell Lateral Raise	2 x 15-20	Light weight. Lift arms to the sides to build shoulder width.

4. Gym Workout B (Streamlined Volume)

Isolation arm work removed to prioritize main muscle groups. Rest 90-120 seconds between sets.

Exercise	Sets x Reps	Execution Notes
Dumbbell Split Squat	2 x 10 /leg	Keep front foot flat, drop back knee straight down. Great for balancing leg strength.
Lying Leg Curl	2 x 12-15	Machine curl. Control the negative (downward) phase.
Lat Pulldown	2 x 10-12	Pull bar to upper chest. Squeeze lats. Builds back width.
Incline DB Press	2 x 10-12	Bench set to 30 degrees. Targets upper chest.
Cable Face Pulls	2 x 15-20	High Priority. Set cable to eye level. Pull rope toward your face, pulling hands apart.
